## **DETAILED ACTION**

1. This Office Action is in responsive to the communication dated 03/01/2007.

## Response to Amendments/Arguments

2. Applicant's arguments see pages 9-14, filed 03/01/2007, with respect to independent amended claims 1 and 19 have been fully considered and are persuasive. Claims 2 and 18 have been cancelled by Applicant. The rejection of claims 1, 3-17 and 19 has been withdrawn.

## Reasons for Allowance

3. Amended Claims 1, 3-17 and 19 are allowed.

Consider **claim 1**, the best prior arts of record found during examination of the present application are Takano et al. (U.S. PGPub 2002/0173312 A1) in view of Miyoshi et al. (U.S. Patent 6,788,737 B1). However, when the teachings of Takano are modified by Miyoshi's fd detection section, if the result of the fd detection section continuously erroneous, the error rate characteristic deteriorates at wide range because of an erroneous threshold value is fixedly used. Therefore, the modification would render the apparatus of Takano unsatisfactory for its intended purpose, which is to provide a mobile communication system capable of setting the optimum threshold.

Therefore, claims 1 and 3-17 are allowed.

Consider claim 19, claim 19 is allowed for the same reason as claim 1.
